### Introducing the Oysta Watch

The Oysta Watch is a discreet telecare solution for Vulnerable Independent People (VIPs) who want to remain independent, with a safety net in place.

The Oysta Watch acts as a regular watch with date, day and time display with extra features such as VIPs can make and receive calls through the watch and it has a one-touch SOS button that connects them to their Alarm Receiving Centre (ARC.)

The Oysta Watch connects to our care platform, IntelliCare™, so the care circle will be able to set safety parameters, locate VIPs and if needed, direct them home or direct help to their location.

### The Oysta Watch is ideal for:

- Active VIPs that have started to experience memory loss and may need locating
- People with learning difficulties who would benefit from the additional safety net while they gain confidence in their independence
- VIPs who want the comfort of a telecare device but want it to be discreet

### Benefits for Vulnerable Independent People (VIPs)

#### One Touch SOS Button

An easy-to-use button for when in distress or simply needing peace of mind. The Oysta Watch connects the VIP to their chosen emergency contact or Alarm Receiving Centre (ARC) and makes a hands-free, two-way voice call.

#### Two-way Voice Calls

The Oysta Watch has a loudspeaker and sensitive microphone to allow clear voice communication.

#### Receive Reminders

The care circle can send care prompts through, such as to consume more water or to remind them of key events such as a care visit appointment

Alert is raised on watch

Alert answered by Alarm Receiving Centre (ARC)

ARC receives information and location

Help is sent to VIP

## Benefits for the Care Circle

### Reminder messages

Messages can be pre-set, flashing up on the Oysta Watch to remind the VIP of key events such as appointments or even to remind them to consume more water.

### Location Updates

You can see on IntelliCare™, where your VIP is located so if they need help, you can guide them directly to their location.

### Safe Zones

Safe Zones are areas where the VIP is likely to travel. Should the VIP travel outside those safe zones, anytime or during specific times of the day or night, a care alert is triggered.

### WeatherWatch

A significant step towards preventative care; WeatherWatch notifies the care circle if the VIP is outside after dark or in extreme weather conditions. You can conduct a welfare check before problems occur, and if needed, guide them home using the location feature on IntelliCare.

### Whitelist of Contacts

Only authorised callers from the care circle can contact the Oysta Watch which eliminates spam calls to the VIP. The whitelist can be changed at any time to add/remove contacts.

### Status Alerts

Through IntelliCare, you'll be notified if your VIP's device is switched on/off, has a low battery or if there has been 'no activity', indicating that the device has not been worn or used.

## Intelligent Care Technology

Oysta helps Vulnerable Independent People (VIPs) stay safe at home and away from home. Our technology encourages VIPs to pursue an active lifestyle with a safety net in place.

The Oysta Watch is one of our telecare devices which protect VIPs when away from their home. We have also developed a range of SafeHome™ sensors to keep VIPs safe when they are at home and enable preventative care efforts of the care circle.

Our devices and sensors link into our easy-to-use care platform, IntelliCare™. IntelliCare is used by the care circle so that they have regular, automatic updates on activity and location enable trends and analysis to support effective care decisions.

Oysta's IntelliCare platform simplifies technology enabled care and transforms reactive care to personalised, preventative care, helping customers to deliver better outcome.

SPECS	
CPU	MTK2502C-ARM7
Memory	128M+64M
Screen	1.54" IPS Full View, full fitting LCD, capacitive touch screen
Resolution	240*240 pixels
BT	4.0
Case Material	Stainless steel
Watch band	Silicon Rubber
Charging	Magnet inductive charging
Battery	Li-polymer 320mah
