Oysta Lite Highlights

The Oysta Lite reduces isolation and improves health by giving Vulnerable Independent People (VIPs) a discreet safety net so they feel confident to leave their home.

The Oysta Lite is a small, discreet device that can be carried in a pocket, on a keyring, or on a lanyard.

It has an SOS button, that, when pressed will notify a chosen contact in the care circle or Alarm Receiving Centre (ARC.)

The Oysta Lite connects to our care platform, **IntelliCare™**, so the care circle will be able to set safety parameters, locate VIPs and if needed, direct them home or direct help to their location.

The Oysta Lite provides peace of mind to VIPs that they can remain independent and safe and when they need help, their care circle is available at a push of a button.

The Oysta Lite is ideal for:

- VIPs that like to be active but have started to experience memory loss/disorientation and may need locating.
- People with learning difficulties who would benefit from the additional safety net whilst they gain confidence in their independence.
- VIPs who want the comfort of a telecare device but want it to be discreet. Oysta Lite fits in a pocket or handbag or on a keyring, there if is needed.

Benefits for Vulnerable Independent People (VIPs)

One Touch SOS Button: When the VIP is in distress or simply needing peace of mind, they can press the discreet, SOS button. The Oysta Lite connects the VIP to their chosen emergency contact or Alarm Receiving Centre (ARC) and makes a hands-free, two-way voice call.

In the event of a fall an SOS call will automatically be activated.

Two-way Voice Calls: The Lite has a loudspeaker and sensitive microphone to allow clear voice communication to help.

Audio Reminders for when the device has low battery to prompt the VIP to charge the device.

Cradle Charging means that the VIP only needs to drop it into the charging cradle to charge the device.

Waterproof: The Oysta Lite is happy in the rain or shower, and strong enough to survive a drop or brief dunking.

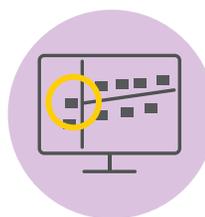

Auto Answer Option automatically answers calls to the Lite. No need to press a button, saving time and effort in an emergency or a welfare check situation.

Alert raised

Alert answered by Alarm Receiving Centre (ARC)

ARC receives information and location

Help is sent to VIP

Benefits for Care Circle

Fall Detection

Should the VIP have a fall it will automatically connect them to their chosen contact or Alarm Receiving Centre (ARC).

Location Updates

You will be able to see on IntelliCare, where your VIP is located so if they need help, you can guide them directly to their location.

Safe Zones

Safe Zones are areas where the VIP is likely to travel. Should the VIP travel outside those safe zones anytime, or during specific times, of the day or night, a care alert is triggered.

WeatherWatch

A significant step towards preventative care; WeatherWatch notifies the care circle if the VIP is outside after dark or in extreme weather conditions.

You can conduct a welfare check before problems occur, and if needed, guide them home using the location feature on IntelliCare.

Whitelist of Contacts

Only authorised callers from the care circle can contact the Oysta Lite. The whitelist can be changed at any time to add/remove contacts.

Status Alerts

Through IntelliCare, you'll be notified if your VIP's device is switched on/off, has a low battery or if there has been 'no activity', indicating that the device has not been worn or used.

Intelligent Care Technology

Oysta helps Vulnerable Independent People (VIPs) stay safe at home and away from home. Our technology encourages VIPs to pursue an active lifestyle with a safety net in place.

The Oysta Lite is one of our telecare devices which protect VIPs when away from their home. However, we have also developed a range of SafeHome™ sensors to keep VIPs safe when they are at home and enable preventative care efforts of the care circle.

Our devices and sensors link into our easy-to-use care platform, IntelliCare™. IntelliCare is used by the care circle so that they have regular, automatic updates on activity and location which enables trends and analysis to support effective care decisions.

Oysta's IntelliCare platform simplifies technology enabled care and transforms reactive care to personalised, preventative care, helping customers to deliver better outcomes

SPECS	
Size	52*38*17.5mm
Weight	50g
FEATURES	
IP Rating	IP67
Speaker	Yes
Microphone	Yes
TECH	
Signal	2G
GSM Freq.	Quad band GSM: 850/900/1800/1900Mhz
GPS	GPS/ AGPS / LBS/ WIFI positioning, Ublox-7020 chip.
Battery	Li-Polymer 420mah
Operating temp	-25°C ~ +65°C
Display	Status LED
Sensors	Accelerometer
